BioPhorum. An exclusive collaboration group.
Helping to facilitate and move the biopharmaceutical industry forward.

Our goal is to accelerate the rate at which the biopharmaceutical industry attains a lean state by building an exclusive community of member companies, focusing on emerging industry challenges, importing and customising appropriate external best practice to deliver outstanding results.

The BioPhorum

 The BioPhorum is a cross industry collaboration with the aim of sharing operational best practices in the areas of

What We Do

 We bring together very senior leaders of the BioPharma industry to enable the interchange of ideas. We are made up of

A Little History

 The BioPhorum was set up in 2004 and the Operations Group in 2008. The BioPhorum team consists of five

Meet The Team

 We have a highly experienced team that work closely with our members. With a background in management

BPOG Mission

To accelerate the rate at which the industry attains a lean state

- Doubling existing efficiency and throughput
- Halving waste, lead-time and compliance risk

by

- Building an exclusive community of your best people
- Focusing their energy on emerging industry challenges
- Importing and customising appropriate external best practice
- Delivering outstanding results that are quickly cloned across member operations

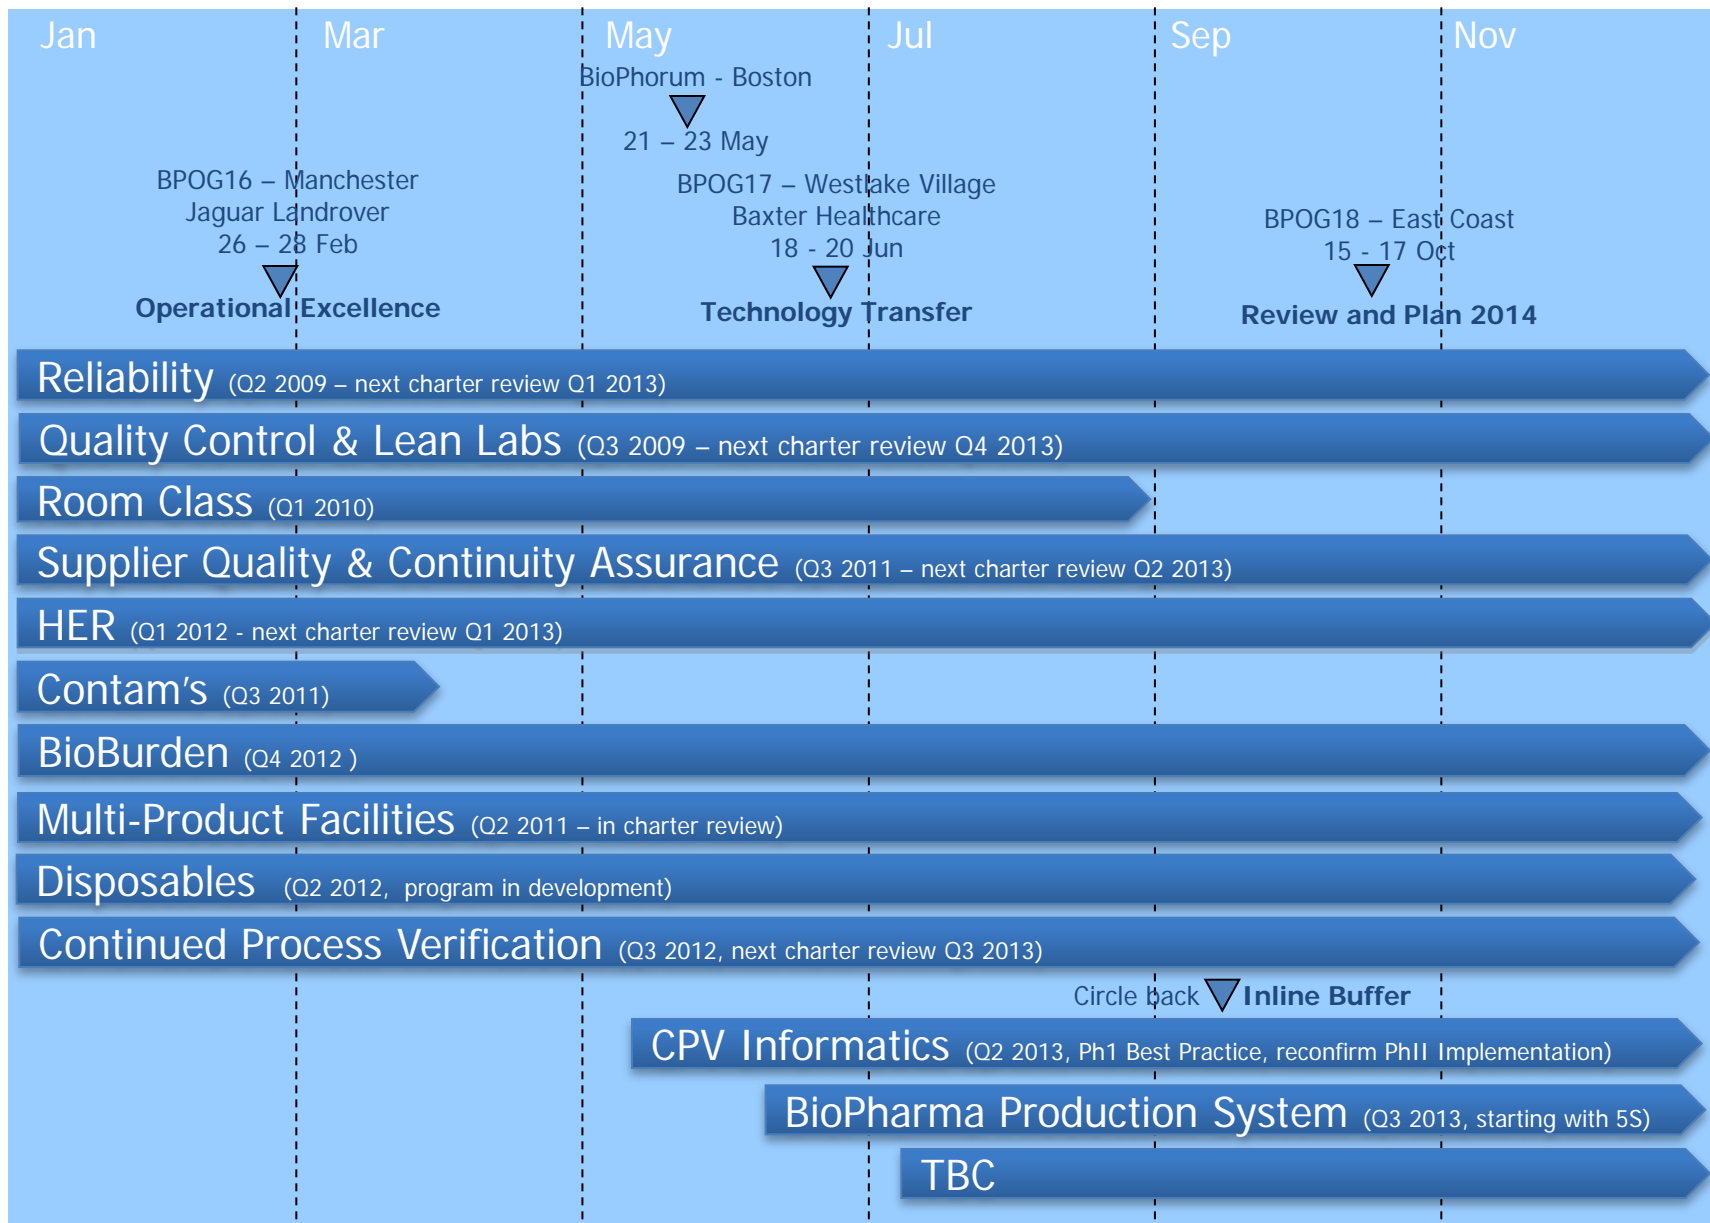

Meaning that the journey will be Better, Faster, Cheaper

BPOG Programme focuses on the hottest issues within biotech

L3 Work Streams
For detailed sharing,
collaboration and long
term communities of
interest

We've begun working with USP with the core aim of harmonising biotech excipients

- Member survey to identify highest priority biotech candidates
- Provision of member data for a pilot multi-compendial excipient
- Share the details of the challenges for this excipient
- Work through the process of harmonisation through the PDG (USP/EP/JP)
